Mo Tami

SENIOR AI LEAD

OPEN TO RELOCATION

SUMMARY

Senior AI Lead with 11+ years of experience designing and delivering scalable AI-powered software platforms across cloud, backend, and AI-enabled applications. Experienced in integrating LLMs, Generative AI, and machine learning into production systems while leading engineering teams and driving end-to-end product delivery. Published researcher in multimodal AI and NLP, with a strong track record of translating cutting-edge research into real-world software products. Comfortable working directly with customers, rapidly prototyping solutions, and owning complex technical problems from design through production.

CORE EXPERTISE

Backend Engineering • Distributed Systems • System Design & Architecture • Cloud-Native Applications • API Design & Integration • Microservices Architecture • Software Architecture • Production Software Delivery • Technical Leadership • Customer-Facing Technical Solutions • Rapid Prototyping • CI/CD & DevOps Practices • Infrastructure Automation • LLM Integration • Generative AI Applications • AI Agents • Retrieval-Augmented Generation (RAG) • Data Engineering & Analytics Platforms

PROFESSIONAL EXPERIENCE

Aurora Technologies @ Apple Program — Senior Lead AI Engineer

📍 Rawabi, Palestine | Oct 2022 – Present

- Design, develop, and maintain internal software systems and AI-powered solutions to streamline business operations.
- Build and optimize AI pipelines leveraging NLP, LLMs, RAG, and agentic architectures.
- Develop RAG pipelines for enterprise knowledge retrieval, semantic search, and context-aware response generation.
- Design agentic workflows to automate complex tasks and orchestrate multi-step processes.
- Optimize AI pipelines for accuracy, performance, scalability, and reliability.
- Lead technical design, system integration, troubleshooting, and continuous improvement of production systems.
- Collaborate with cross-functional teams to translate business requirements into effective technical solutions.
- Continuously research and integrate emerging AI technologies to enhance internal systems and automation capabilities.
- Support production systems through ongoing maintenance, performance tuning, and continuous improvement.

PROFESSIONAL EXPERIENCE

AUI (US-based) — Senior Data Engineer

📍 Remote | Jan 2022 – Sep 2022

- Designed and operated cloud-based data platforms supporting production machine learning and analytics workloads.
- Built scalable data pipelines and deployment infrastructure for more than 15 production ML services running on AWS.
- Improved ETL and reporting performance by over 40% through data model optimization and distributed processing with Spark and EMR.
- Developed monitoring and observability solutions that significantly improved production reliability and reduced data quality issues.
- Collaborated with software engineers, data scientists, and business stakeholders to deliver reliable data products supporting operational decision-making.
- Automated deployment workflows, model versioning, and production monitoring to improve reproducibility and operational efficiency.
- Contributed to architecture decisions for scalable cloud infrastructure supporting high-volume data processing.

Harri (US-based) — Backend Engineer

📍 Remote | Oct 2020 – Dec 2021

- Designed and developed backend services powering a large-scale HR platform serving enterprise customers.
- Built scalable REST APIs and distributed backend services with a strong focus on reliability, maintainability, and performance.
- Improved application performance by up to 80% through distributed caching, query optimization, and backend architecture improvements.
- Designed SQL and NoSQL data models supporting both transactional and analytical workloads.
- Supported production systems across global deployments, participating in incident response, monitoring, and operational improvements.
- Worked closely with cross-functional teams to deliver customer-facing features from design through production.

Nvidia — Software Engineer

📍 Rawabi, Palestine | Jun 2015 – Dec 2018

- Designed, developed, and maintained automated test frameworks using Python and C/C++ to validate network drivers and ensure software quality and reliability.
- Conducted comprehensive functional, stability, and performance testing of InfiniBand and Ethernet network adapters.
- Executed network performance benchmarks using tools such as sockperf, analyzing test results to evaluate performance and identify potential bottlenecks.
- Investigated and debugged test failures, performed root-cause analysis, and collaborated with development teams to resolve software and driver issues.

TEACHING EXPERIENCE

📍 **Arab American University - Part-Time Lecturer**

Sept 2025 – Feb 2026

- Designed and delivered undergraduate coursework in Big Data Analytics, covering distributed systems, data engineering, and predictive analytics.
- Developed hands-on projects emphasizing production-scale data processing and cloud technologies.
- Mentored students on applied AI, software engineering, and research projects.

TECHNICAL SKILLS

Languages
Python • TypeScript • JavaScript • PHP • SQL • Bash

Backend & Software Engineering
FastAPI • Django • Laravel • Node.js • REST APIs • Microservices • Distributed Systems

Cloud & Platform Engineering
AWS (ECS, Lambda, RDS, S3, SageMaker) • Docker • Kubernetes • GitHub Actions • Jenkins • CI/CD • Serverless Architecture

AI & Generative AI
LLM Integration • Generative AI Applications • Retrieval-Augmented Generation (RAG) • Hugging Face • AI System Architecture • Prompt Engineering • Vector Databases • Semantic Search • Production ML Pipelines

Data Engineering
Apache Spark • Kafka • Snowflake • Rivery • ETL/ELT • Data Streaming • SQL Optimization

Tools
Git • Postman • Jupyter • VS Code • Metabase • AWS QuickSight

EDUCATION

Arab American University
M.Sc. in Data Science and Business Analytics | 2023–2025
GPA: 4.0/4.0

An-Najah National University
B.Sc. in Computer Engineering | 2010–2015
